

# Social Distancing app

- The different types of interactions in app would be:-
  - i) Button Press
  - ii) Type Input area for login
  - iii) Audio
  - iv) Map locator.
- The basic idea of the app is about a social distancing application that reacts whenever someone comes up near their location.
- It would have a map to show nearby containment zones, etc.
- The app shall be linked with The National Authority

(First login page)
